ANNEX I

SUMMARY OF PRODUCT CHARACTERISTICS
1. **NAME OF THE VETERINARY MEDICINAL PRODUCT**

Sensiblex 40 mg/ml solution for injection for cattle (AT, BG, CY, CZ, DE, EE, EL, ES, HR, HU, IT, LT, LU, LV, MT, NL, PL, PT, RO, SI, SK, UK)

Sensiblex Solution Injectable Pour Bovins (FR)

2. **QUALITATIVE AND QUANTITATIVE COMPOSITION**

1 ml contains:

**Active substance:**
- Denaverine hydrochloride 40.0 mg (equivalent to 36.5 mg Denaverine)

**Excipients:**
- Benzyl alcohol (E1519) 20.0 mg

For the full list of excipients, see section 6.1.

3. **PHARMACEUTICAL FORM**

Solution for injection
- Clear, colourless solution

4. **CLINICAL PARTICULARS**

4.1 **Target species**

Cattle (cows, heifers)

4.2 **Indications for use, specifying the target species**

**Cows, heifers:**
- Promotes dilation of the soft tissues of the birth canal in cases where the birth canal is insufficiently opened.
- Regulates uterine contractions in animals with hypertonic muscular contractions of the uterus.

**Heifers:**
- Promotes dilation of the soft tissues of the birth canal to facilitate parturition.

4.3 **Contraindications**

Do not administer in cases of mechanical obstetrical disorders.
Do not use in cases of hypersensitivity to the active substance or to any of the excipients.

4.4 **Special warnings for each target species**

The product is ineffective if no part of the foetus has entered the cervical canal and if abdominal pressing has not started.
Before administering the product it is important to ensure there are no mechanical obstructions (e.g. oversized foetus). If present, obstructions must be removed prior to product administration (e.g. correction of abnormal presentation or uterine torsion).
4.5 **Special precautions for use**

**Special precautions for use in animals**

None.

**Special precautions to be taken by the person administering the veterinary medicinal product to animals**

The product has a potential to affect uterine musculature. Therefore, pregnant women and those women who are attempting to conceive should not handle or administer the product. Administration should be performed with caution in order to avoid accidental self-injection. In case of accidental self-injection, seek medical advice immediately and show the package leaflet or the label to the physician. Accidental spillage onto skin or into the eyes should be thoroughly rinsed off with water. People with known hypersensitivity to denaverine hydrochloride or to any of the excipients should not administer the product. Wash hands after use.

4.6 **Adverse reactions (frequency and seriousness)**

Increased restlessness; swellings at the injection site; absent or insufficient effectiveness necessitating further obstetric measures.

4.7 **Use during pregnancy, lactation or lay**

Use at the time of parturition only. Not for use during other stages of pregnancy or during lactation.

4.8 **Interaction with other medicinal products and other forms of interaction**

The product should not be mixed with other veterinary medicinal products. In the case of additional administration of oxytocin or its analogues, the dose of this active substance must be carefully selected because denaverine may amplify its effects.

4.9 **Amounts to be administered and administration route**

For intramuscular use.

- **Heifers:** 10.0 ml product (400 mg Denaverine hydrochloride / animal)
- **Cows:** 10.0 ml product (400 mg Denaverine hydrochloride / animal)

Timing of product administration:

- Use in heifers to facilitate parturition: the product should be administered as soon as parts of the foetus are within the cervical canal and abdominal pressing has started.

- Use in heifers and cows to promote dilation of the soft tissues of the birth canal: the product can be administered immediately after the veterinary surgeon has determined that insufficient opening of the soft birth canal is present (please also refer to section 4.3 [contraindications] and 4.4 [special warnings] of the SPC).
In cases where full dilation is not achieved, product administration may be repeated once after 40 – 60 minutes.

4.10 Overdose (symptoms, emergency procedures, antidotes), if necessary

In case of overdose or intravenous application, anticholinergic effects, e.g. increased heart and decreased respiration rate may occur. Do not exceed the recommended dose.

4.11 Withdrawal period(s)

Cattle:                                   Meat and offal:  1 day
                                              Milk:           24 hours

5. PHARMACOLOGICAL PROPERTIES

Pharmacotherapeutic group: Genitourinary system and sex hormones; other gynaecologicals

ATCvet code: QG02CX90

5.1 Pharmacodynamic properties

Denaverine hydrochloride is a spasmolytic agent with a relaxant effect on smooth muscle. It has a relaxing effect on the uterus sub partu and increases the distensibility of the soft-tissue of the birth canal. Following intramuscular injection the spasmolytic effect commences within 15 to 30 minutes and lasts for several hours. The mechanism of action is not known.

5.2 Pharmacokinetic particulars

Denaverine is excreted rapidly from the treated animals.

6. PHARMACEUTICAL PARTICULARS

6.1 List of excipients

Benzyl alcohol (E1519)
Propylene glycol
Hydrochloric acid (for pH adjustment)
Water for injections

6.2 Incompatibilities

In the absence of compatibility studies, this veterinary medicinal product must not be mixed with other veterinary medicinal products.

6.3 Shelf life

Shelf life of the veterinary medicinal product as packaged for sale:
2 years
Shelf life after first opening the immediate packaging:
28 days

6.4. Special precautions for storage

This veterinary medicinal product does not require any special storage conditions.

6.5 Nature and composition of immediate packaging

Vial of colourless glass, type I, with a fluorinated bromobutyl rubber stopper and an aluminium cap;

1 vial (10 ml) in a cardboard box.
1 vial (50 ml) in a cardboard box.

Not all pack sizes may be marketed.

6.6 Special precautions for the disposal of unused veterinary medicinal product or waste materials derived from the use of such products

Any unused veterinary medicinal product or waste materials derived from such veterinary medicinal product should be disposed of in accordance with local requirements.

7. MARKETING AUTHORISATION HOLDER

Veyx-Pharma GmbH
Söhreweg 6
34639 Schwarzenborn
Germany

8. MARKETING AUTHORITY NUMBER(S)

9. DATE OF FIRST AUTHORISATION/RENEWAL OF THE AUTHORITY

<Date of first authorisation: >{DD/MM/YYYY}={DD month YYYY}.
<Date of last renewal: >{DD/MM/YYYY}={DD month YYYY}.

10. DATE OF REVISION OF THE TEXT

PROHIBITION OF SALE, SUPPLY AND/OR USE

Not applicable.

B. PACKAGE LEAFLET
1. **NAME AND ADDRESS OF THE MARKETING AUTHORISATION HOLDER AND OF THE MANUFACTURING AUTHORISATION HOLDER RESPONSIBLE FOR BATCH RELEASE, IF DIFFERENT**

Veyx-Pharma GmbH  
Söhreweg 6  
34639 Schwarzenborn  
Germany

2. **NAME OF THE VETERINARY MEDICINAL PRODUCT**

Sensiblex 40 mg/ml solution for injection for cattle  
Denaverine hydrochloride

3. **STATEMENT OF THE ACTIVE SUBSTANCE(S) AND OTHER INGREDIENT(S)**

Sensiblex is a clear colourless solution for injection containing:  
**Active substance:**  
Denaverine hydrochloride  40.0 mg/ml (equivalent to 36.5 mg/ml Denaverine)  
**Excipients:**  
Benzyl alcohol (E1519)  20.0 mg/ml

4. **INDICATION(S)**

Cows, heifers:  
- Promotes dilation of the soft tissues of the birth canal in cases where the birth canal is insufficiently opened.  
- Regulates uterine contractions in animals with hypertonic muscular contractions of the uterus.

Heifers:  
- Promotes dilation of the soft tissues of the birth canal to facilitate parturition.

5. **CONTRAINDICATIONS**

Do not administer in cases of mechanical obstetrical disorders.  
Do not use in cases of hypersensitivity to the active substance or to any of the excipients.

6. **ADVERSE REACTIONS**

Increased restlessness; swellings at the injection site; absent or insufficient effectiveness necessitating further obstetric measures.

If you notice any serious effects or other effects not mentioned in this package leaflet, please inform your veterinary surgeon.
7. TARGET SPECIES

Cattle (cows, heifers)

8. DOSAGE FOR EACH SPECIES, ROUTE(S) AND METHOD OF ADMINISTRATION

For intramuscular use.

Heifers: 10.0 ml product (400 mg Denaverine hydrochloride / animal)
Cows: 10.0 ml product (400 mg Denaverine hydrochloride / animal)

9. ADVICE ON CORRECT ADMINISTRATION

Timing of product administration:

- Use in heifers to facilitate parturition: the product should be administered as soon as parts of the foetus are within the cervical canal and abdominal pressing has started.

- Use in heifers and cows to promote dilation of the soft tissues of the birth canal: the product can be administered immediately after the veterinary surgeon has determined that insufficient opening of the soft birth canal is present (please also refer to section 5 [contraindications] and 12 [special warnings] of the Package Leaflet).

In cases where full dilation is not achieved, product administration may be repeated once after 40 – 60 minutes.

10. WITHDRAWAL PERIOD

Cattle: Meat and offal: 1 day
                   Milk: 24 hours

11. SPECIAL STORAGE PRECAUTIONS

Keep out of the sight and reach of children.
This veterinary medicinal product does not require any special storage conditions.
Do not use this veterinary medicinal product after the expiry date which is stated on the carton and vial label after “EXP”. The expiry date refers to the last day of that month. Shelf life after first opening the immediate packaging: 28 days.
When the container is broached (opened) for the first time, using the in-use shelf-life which is specified on this package insert, the date on which any product remaining in the vial should be discarded should be worked out. This discard date should be written in the space provided on the label.

12. SPECIAL WARNING(S)

Special warnings for each target species:
The product is ineffective if no part of the foetus has entered the cervical canal and if abdominal pressing has not started. Before administering the product it is important to ensure there are no mechanical obstructions (e.g. oversized foetus). If present, obstructions must be removed prior to product administration (e.g. correction of abnormal presentation or uterine torsion).

Special precautions for use in animals:

None.

Special precautions to be taken by the person administering the veterinary medicinal product to animals:

The product has a potential to affect uterine musculature. Therefore, pregnant women and those women who are attempting to conceive should not handle or administer the product. Administration should be performed with caution in order to avoid accidental self-injection. In case of accidental self-injection, seek medical advice immediately and show the package leaflet or the label to the physician. Accidental spillage onto skin or into the eyes should be thoroughly rinsed off with water. People with known hypersensitivity to denaverine hydrochloride or to any of the excipients should not administer the product. Wash hands after use.

Pregnancy:
Use at the time of parturition only. Not for use during other stages of pregnancy or during lactation.

Interaction with other medicinal products and other forms of interaction:
The product should not be mixed with other veterinary medicinal products. In the case of additional administration of oxytocin or its analogues, the dose of this active substance must be carefully selected because denaverine may amplify its effects.

Overdose (symptoms, emergency procedures, antidotes):
In case of overdose or intravenous application, anticholinergic effects, e.g. increased heart and decreased respiration rate may occur. Do not exceed the recommended dose.

Incompatibilities:
In the absence of compatibility studies, this veterinary medicinal product must not be mixed with other veterinary medicinal products.

13. SPECIAL PRECAUTIONS FOR THE DISPOSAL OF UNUSED PRODUCT OR WASTE MATERIALS, IF ANY

Any unused veterinary medicinal product or waste materials derived from such veterinary medicinal product should be disposed of in accordance with local requirements.

14. DATE ON WHICH THE PACKAGE LEAFLET WAS LAST APPROVED

15. OTHER INFORMATION

1 vial (10 ml) in a cardboard box
1 vial (50 ml) in a cardboard box
Not all pack sizes may be marketed.
